

# TZIDC-110

## Electro-Pneumatic Positioner

Compact, well-proven, and flexible

For PROFIBUS PA

Low operating cost

Compact design

Well-proven technology

Robust and environmentally ruggedized

Wide operating temperature range

— -40 ... 85 °C (-40 ... 185 °F)

Easy to commission, “single pushbutton” operating philosophy

Mechanical position indicator

ATEX, FM, CSA, GOST and IECEx approvals

## 1 Description

The TZIDC-110 is an electronically configurable positioner with communication capabilities designed for mounting to pneumatic linear or rotary actuators. It features a small and compact design, a modular construction, and an excellent cost-performance ratio.

Fully automatic determination of the control parameters and adaptation to the final control element yield considerable time savings and an optimal control behavior.

### 1.1 Pneumatics

An I/P module with subsequent pneumatic amplifier is used to control the pneumatic actuator. The well-proven I/P module proportionally converts the permanent electrical positioning signal from the CPU into a pneumatic signal used to adjust a 3/3-way valve.

The air flow for pressurizing or depressurizing the actuator is continuously adjusted. As a result, excellent control is achieved. When reaching the set point, the 3/3-way valve is closed in center position to minimize the air consumption.

Four different pneumatics versions are available: for single-acting or double-acting actuators, each with "fail-safe" or "fail-freeze" function.

#### 1.1.1 "Fail-safe" function

If the electrical power supply fails, the positioner output 1 is depressurized, and the pneumatic actuator's return spring moves the valve to the defined safe position. In case of a double-acting actuator the second output 2 is additionally pressurized.

#### 1.1.2 "Fail-freeze" function

If the electrical power supply should fail, the positioner output 1 (and 2, if applicable) is closed and the pneumatic actuator stops ("freezes") the valve in the current position. If compressed air supply should fail, the positioner depressurizes the actuator.

### 1.2 Operation

The positioner has a built-in operating panel providing a 2-line LCD and 4 pushbuttons for optimal local configuration, commissioning and operational monitoring.

Alternatively, the appropriate configuration program and the available communication option can be used.

### 1.3 Communication

Communication with the TZIDC-110 positioner occurs via PROFIBUS PA.

### 1.4 Modular design

The TZIDC-110 basic model can be enhanced at any time by retrofitting optional equipment. Option modules for analog or digital position feedback or a shutdown-module can be installed. Additionally, a mechanical position indicator, proximity switches or 24 V microswitches are available for indicating the position independently of the mother board function.

Fig. 1: TZIDC-110 schematic diagram

**Basic model**

- 1 Bus connector
- 2 Supply, 1.4 ... 6 bar
- 3 Exhaust
- 4 I/P module with 3/3-way valve
- 5 Position sensor (optional up to 270° rotation angle)

**Optional upgrades**

- 6 Plug-in module for safety shutdown (forced depressurization)
- 7 Mechanical position indicator
- 8 Mechanical feedback with proximity switches
- 9 Mechanical feedback with microswitches 24 V

**Note**

With optional upgrades either the “mechanical feedback with proximity switches” (8) or the “mechanical feedback with microswitches 24 V” (9) can be used.  
In both cases, the “mechanical position indicator” (7) must be installed.

## **2 Mounting versions**

### **2.1 To linear actuators in accordance with the standard**

Lateral attachment is in accordance with DIN / IEC 534 (lateral attachment to NAMUR). The required attachment kit is a complete set of attachment material, but does not include the screwed pipe connections and air pipes.

### **2.2 To rotary actuators in accordance with the standard**

This attachment is designed for mounting according to the standard VDI/VDE 3845. The attachment kit consists of a console with mounting screws for mounting on a rotary actuator. The adapter for coupling the positioner feedback shaft to the actuator shaft has to be ordered separately. Screwed pipe connections and air pipes have to be provided on site.

### **2.3 Integral mounting to control valves**

The TZIDC-110 positioner featuring standard pneumatic action is also suitable for integral mounting.

The required holes are found at the back of the device.

The benefit of this design is that the point for mechanical stroke measurement is protected and that the positioner and actuator are linked internally. No external tubing is required.

### **2.4 Special actuator-specific mounting**

In addition to the mounting methods described above, there are special actuator-specific attachments.

Please contact us for details.

- 2 Mounting to rotary actuators to VDI / VDE 3845

- 3 Integral mounting to control valves
- 4 Integral mounting to control valves by using an adapter panel

## 3 Operation

### 3.1 General

Microprocessor-based position control in the TZIDC-110 provides for optimal results. The positioner features high-precision control functions and high operational reliability. Due to their elaborate structure and easy accessibility, the device parameters can be quickly adapted to the respective application.

**The total range of parameters includes:**

- Operating parameters
- Adjustment parameters
- Monitoring parameters
- Diagnosis parameters
- Maintenance parameters

#### 3.1.1 Operating parameters

##### Signal range 0 ... 100%

Subranges are configurable, min. range 20 %  
Recommended range > 50 %

##### Action (positioning signal)

Increasing: Positioning signal 0 ... 100 % = direction 0 ... 100 %  
Increasing: Positioning signal 0 ... 100 % = direction 100 ... 0 %

##### Characteristic curve (travel = f {signal})

Linear, equal percentage 1:25 or 1:50 or 25:1 or 50:1 or freely configurable with 20 reference points.

##### Travel limit

The positioning travel, i.e. the stroke or angle of rotation, can be reduced as required within the full range of 0 ... 100 %, provided that a minimum value of 20 % is observed.

##### Shut-off function

This parameter can be set separately for each end position. When the respective configured limit value is exceeded, the shut-off function causes immediate travel of the actuator until reaching the set end position.

##### End Position Behavior

Selection option for behavior when moving into the end position. Either the positioner additionally pressurizes the actuator and reaches full actuating force in the end position, or it continues to control the actuator in the end position and pressurizes the actuator only as much as is required to maintain the position.

##### Travel time prolongation

This function can be used to increase the max. travel time for full travel. This time parameter can be set separately for each direction.

##### Note

This function can only be used with the pneumatics with the safety function "fail-safe".

##### Switching points for the position

This parameter allows you to define two position limits for signaling (see option "Module for digital position feedback").

### 3.1.2 Adjustment parameters

The TZIDC-110 positioner has a special function for automatic adjustment of the parameters.

Additionally, the control parameters can be set manually to optimally adapt them to the process requirements.

##### Tolerance band

When reaching the tolerance band the position is considered as corrected. From this point on, the position is further slowly re-adjusted until the dead band is reached. The factory setting for this parameter is 0.3 %.

##### Dead band (sensitivity)

When reaching the dead band, the position is held. The factory setting for this parameter is 0.1 %.

##### Actuator spring action

Selection of the sensor shaft rotating sense (looking into the open case), if the valve is moved to the safe position by the actuator spring (actuator is depressurized via Y1/OUT1).

For double-acting actuators the actuator spring action corresponds to pressurizing the pneumatic output (OUT2).

##### Display 0 ... 100 %

Adjusting the display (0 ... 100%) according to the direction of action for opening or closing the valve.

### 3.1.3 Monitoring parameters

Various functions for permanent operational monitoring are implemented in the TZIDC-110 operating program, e.g.:

- Internal positioning time-out
- Sensor monitoring
- Backup monitoring

While automatic commissioning is in progress, the current state is continuously indicated on the integrated LCD. Remaining messages can be retrieved via the user interface.

The fieldbus enables users to implement enhanced monitoring in the control system. A special window displays the most important process variables ONLINE such as the positioning signal (in %), the position (in %), the control deviation (in %) as well as the status messages.

### 3.1.4 Diagnosis parameters

The diagnosis parameters of the TZIDC-110 program inform the operator about the operating conditions of the valve.

From this information the operator can derive which maintenance works are required, and when.

Additionally, limit values can be defined for these parameters. When they are exceeded, an alarm is reported.

The following values are e.g. determined:

- Number of movements performed by the valve
- Total travel

The diagnostic parameters and limit values can be called up, set and reset using the configuration program.

### 3.2 Operator panel

The TZIDC-110 positioner's operator panel with four pushbuttons allows for

- operational monitoring
- manual control
- configuration
- fully automatic commissioning

The operator panel is protected by a cover which avoids unauthorized access to the operating elements.

### 3.2.1 Single-button commissioning

Commissioning the TZIDC-110 positioner is especially easy. The standard Autoadjust function for automatic adaptation of the device parameters can be started by simply pressing a single front panel button, and without knowing parameterization details.

Depending on the selected actuator type (linear or rotary), the displayed zero position is automatically adapted:

- for linear actuators counter-clockwise (CTCLOCKW)
- for rotary actuators clockwise (CLOCKW).

Besides this standard function, a customized "Autoadjust" function is available. The function is launched either via the operator's panel or the configuration program.

### 3.2.2 Display

The information indicated by the 2-line LCD is permanently updated and adapted during operation, to inform the operator in an optimal way.

During control operation the following TZIDC-110 data can be called up by pressing the pushbuttons briefly:

Up button	Cyclic communication:
	- Setpoint (%)
	- Setpoint status
	Acyclic communication:
	- Status of communication
Down button	Operating mode on the bus and bus address
Enter	Software Version

Fig. 3: TZIDC-110 with removed cover, view of the operator panel

Fig. 4: TZIDC-110 operating elements and display

## 4 Communication

### 4.1 General

PROFIBUS is a manufacturer-independent, open fieldbus standard for use in the manufacturing industry and process automation. It is ideally suited for time-critical applications with high transmission rates as well as for complex communication activities. The flexible structure allows the mechanical mount and transmission speed to be easily adapted to the specific application. A standard communication protocol is used on a universal basis.

### 4.2 PROFIBUS PA

PROFIBUS PA was developed primarily for process automation solutions.

The transmission method (physical layer in the ISO/OSI model) complies with IEC 61158. The power supply for the field devices is provided concurrent with signal transmission via the fieldbus line. PROFIBUS PA is also suited for use in explosion-proof installations.

### 4.3 Benefits of PROFIBUS communication

- Standardized device profiles ensure interoperability of devices from various manufacturers
- Acyclic access to device data (even during operation) for configuration, diagnostics and service
- High system uptimes based on comprehensive device and bus diagnostics as well as default value strategies in the event of an error
- Support for efficient facility management through provision of operating values

### 4.4 Positioner TZIDC-110 for PROFIBUS PA

The TZIDC-110 positioner complies with the Profibus PA profile for process devices "Electro-pneumatic actuators V3.0". This ensures interoperability in connection with third-party control systems.

In conformance with PROFIBUS conventions, data can be output during cyclic data transfer in operating modes AUT, MAN or RCAS and can be written in operating mode O/S (out-of-service).

Newly set parameters are saved in the non-volatile memory directly upon download to the device, and become active immediately.

### 4.5 Device management for TZIDC-110

For the TZIDC-110, a graphic user interface known as the "DTM" is available. The DTM is based on FDT/DTM technology (FDT 1.2) and can be integrated in a control system as well as a separate PC with the DVS401 configuration software (SMART VISION). The device can thus be commissioned, operated and serviced from a single user interface.

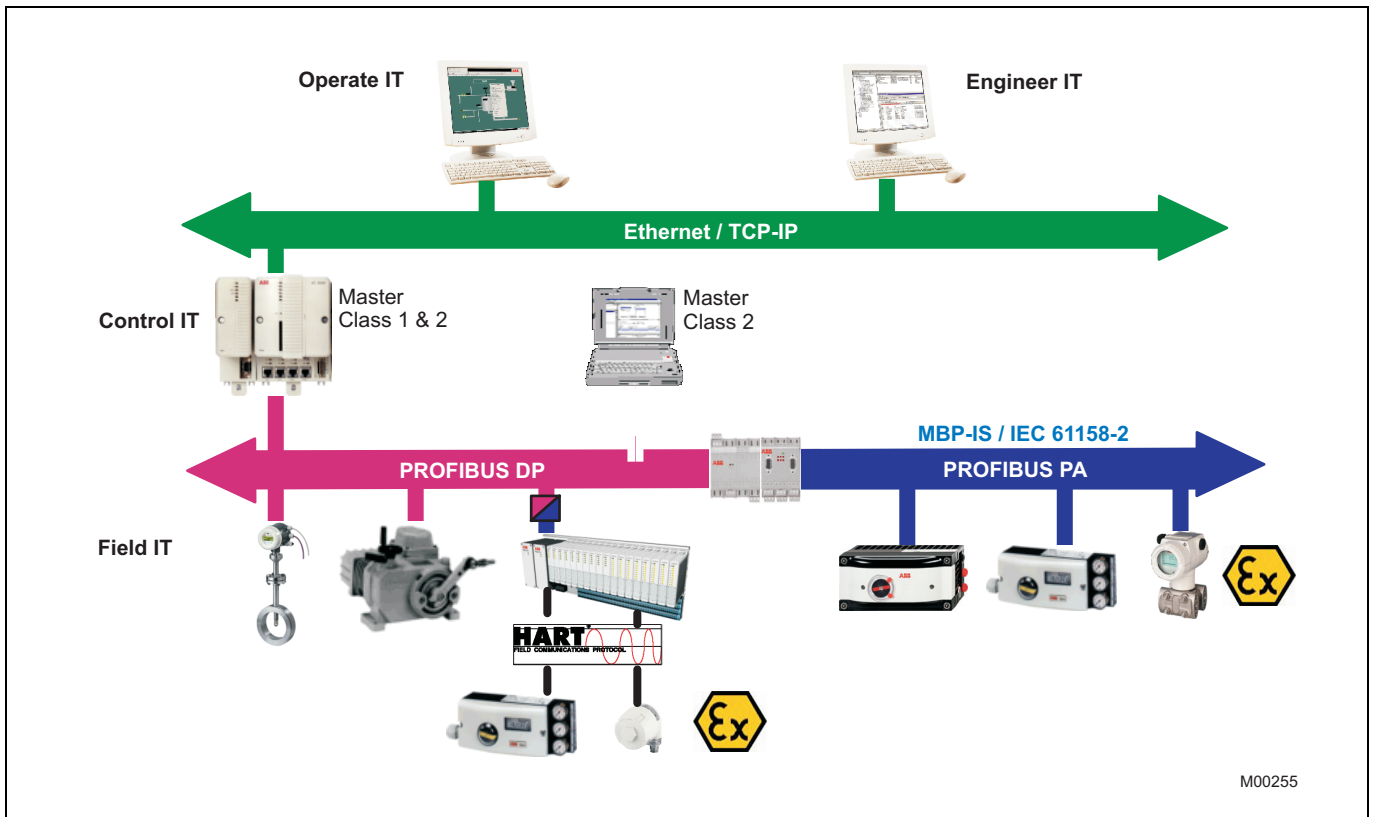

Fig. 5: Communication via PROFIBUS

## 5 Technical data

### 5.1 Communication

<b>Profiles</b>	Profibus PA profile for process devices Electro-pneumatic actuators V3.0
<b>Block types</b>	1 AO Functional block 1 Transducer block 1 physical block
<b>Physical Layer</b>	In compliance with IEC 61158-2
<b>Transmission rate</b>	31.25 Kbit/s
<b>Supply voltage</b>	Power feed from the PA bus, 9.0 ... 32.0 V DC
<b>Max. permissible voltage</b>	35 V DC
<b>Power consumption</b>	10.5 mA
<b>Current in the event of an error</b>	15 mA (10.5 mA + 4.5 mA)

### 5.2 Designation

<b>Device name</b>	TZIDC-110
<b>PNO ID no.</b>	0x0639
<b>Dev. ID</b>	0X3200028xyz
<b>Bus address</b>	Between 0 and 126, default address 126

### 5.3 Output

<b>Range</b>	0 ... 6 bar (0 ... 90 psi)
<b>Air capacity</b>	at 1.4 bar (20 psi) supply pressure  5.0 kg/h = 3.9 Nm <sup>3</sup> /h = 2.3 scfm at supply pressure of 6 bar (90 psi)  13 kg/h = 10 Nm <sup>3</sup> /h = 6.0 scfm
<b>Output function</b>	For single or double-acting actuators, air is vented from actuator or actuator is blocked in case of (electrical) power failure
<b>Shut-off values</b>	end position 0 % = 0 ... 45 %  end position  100 % = 55 ... 100 %

### 5.4 Travel

<b>Rotation angle</b>	
Used range	
25 ... 120°	(rotary actuators, optionally 270°)
25 ... 60°	(linear actuators)

#### Travel time prolongation

Setting range	0 ... 200 seconds, separately for each direction
---------------	--

### 5.5 Air supply

<b>Instrument air</b>	free of oil, water and dust acc. to DIN / ISO 8573-1 pollution and oil content according to Class 3 (purity: max. particle size: 5 µm, max. particle density: 5 mg / m <sup>3</sup> ; oil content: max. concentration: 1 mg / m <sup>3</sup> ; pressure dew point: 10 K below operating temperature
<b>Supply pressure</b>	1.4 ... 6 bar (20 ... 90 psi)  Note: Do not exceed the max. operating pressure of the actuator!
<b>Air consumption</b>	< 0,03 kg/h / 0,015 scfm (independent of supply pressure)

### 5.6 Transmission data and influences

#### Output Y1

Increasing:	Increasing output signal 0 ... 100 %  Increasing pressure at output Y1
Increasing:	Increasing output signal 0 ... 100 %  Decreasing pressure at output Y1

#### Action (positioning signal)

Increasing:	Signal 4 ... 20 mA = actuator position 0 ... 100 %
Increasing:	Signal 20 ... 4 mA = actuator position 0 ... 100 %
Characteristic deviation	≤ 0,5 %
Tolerance band	0.3 ... 10 %, adjustable
Dead band	0,1 ... 10 %, adjustable
Resolution (A/D conversion)	> 16000 steps
Sample rate	20 ms
Influence of ambient temperature	≤ 0.5 % per 10 K
Influence of vibration	≤ ± 1 % to 10 g and 80 Hz

#### Seismic requirements

Meets requirements of DIN / IEC 68-3-3 Class III for strong and strongest earthquakes.

#### Influence of mounting orientation

Not measurable.

#### Meets the requirements of the following directives

- EMC Directive 89 / 336 / EWG as of May 1989
- EC Directive for CE conformity marking

## 5.7 Environmental capabilities

### Ambient temperature

For operation, storage and transport: -40 ... 85 °C

When using proximity switches SJ2-S1N (NO): -25 ... 85 °C

### Relative humidity

Operational (with closed housing and air supply switched on): 95 % (annual average), condensation permissible

Transport and storage: 75 % (annual average), non-condensing

## 5.8 Housing

### Material/Protections

Aluminum, protection class IP 65 / NEMA 4X

### Surface/color

Electrostatic dipping varnish with epoxy resin, stove-hardened. Case varnished black, RAL 9005, matte, housing cover Pantone 420.

### Electrical connections

Screw terminals: Max. 1.0 mm<sup>2</sup> for options,  
Max. 2.5 mm<sup>2</sup> for bus connection.

Note: Do not expose the terminals to strain.

Cable entry: 2 tap holes 1/2-14 NPT or  
M20 x 1.5 (1 x with cable gland and  
1 x with pipe plug)

### Pneumatic connections

Threads G 1/4 or 1/4-18 NPT

### Weight

1.7 kg

### Mounting orientation

any orientation allowed

### Dimensions

see dimensional drawings

## 5.9 Explosion protection

Power	Pi = 5.32 W	Pi = 2.52 W	Pi = 1.2 W
Characteristic	rectangular	trapezoidal	linear

## 5.10 Options

### Module for the emergency shutdown function

Supply voltage	24 V DC (20 ... 30 V DC) (galvanically isolated from input signal)
Safe position is activated when	voltage < 5 V
Explosion protection	see certificate (operating instructions)

A separate 24 V DC signal is normally applied to the emergency shutdown module, which connects through the signal from the microprocessor to the I/P module.

When the 24 V DC signal is interrupted, the pneumatic module executes the respective safety function, depending on the mechanical construction:

The positioner output Y1 is depressurized, and the valve is moved to the safe position. In case of a double-acting actuator the second output Y2 is additionally pressurized.

#### Note

The emergency shutdown module can only be used with pneumatics with the safe position "fail-safe".

The emergency shutdown module works independently of the mother board, i.e. all information from the final control element is available in the supervisory process control system at any time.

### Digital position feedback with proximity switches<sup>1)</sup>

Two proximity switches for independent position signaling. Switching points adjustable between 0 ... 100 %

Current circuits acc. to DIN 19234 / NAMUR

Supply voltage	5 ... 11 V DC
Signal current < 1 mA	Switching state logical "0"
Signal current > 2 mA	Switching state logical "1"

### Direction of action (logical state)

Proximity switch	Position			
	< Lim. 1	> Lim. 1	< Lim. 2	> Lim. 2
SJ2-SN (NC)	0	1	1	0
SJ2-S1N (NO)	1	0	0	1

#### Note

When using SJ2\_S1N (NO), the TZIDC positioner may only be used at an ambient temperature range from -25 ... 85 °C.

### Digital position feedback with 24 V microswitches<sup>1)</sup>

Two microswitches for independent position signaling. Switching points adjustable between 0 ... 100 %.

Voltage	max. 24 V AC / DC
Load rating	max. 2 A
Contact surface	10 µm Gold (AU)

### Mechanical position indicator

Indicator disk in enclosure cover, linked with positioner feedback shaft.

#### Note

These options are also available for retrofitting by Service.

- <sup>1)</sup> The proximity switches or 24 V microswitches for digital feedback are activated directly via the positioner axis and can only be used in combination with the optionally available mechanical position indicator.

## 5.11 Accessories

### Mounting material

- Attachment kit for linear actuators to DIN/IEC 534 / NAMUR
- Attachment kit for rotary actuators to VDI/VDE 3845
- Attachment kit for integral mounting to control valves
- Attachment kit for actuator-specific attachment upon request

### Pressure gauge block

With pressure gauges for supply and output pressure. Pressure gauges with housing ø 28 mm, with connection block in aluminum, black with installation material for mounting to TZIDC-110.

### Filter regulator

All metal version, brass varnished black. Filter element: Bronze, 40 µm, with condensate drain.

max. pre-pressure 16 bar, output adjustable to 1.4 ... 6 bar

### PC software for configuration and operation

DSV401 (SMART VISION) with DTM for TZIDC-110 / TZIDC-210 available on CD ROM (see data sheet 63-1.20 EN)

Certificate of compliance	with the order acc. to EN 10204-2.1 (DIN 50049-2.1) with item description	CF2			
Test Report acc. to EN 10204-2.2 (DIN 50049-2.2)		CF3			
Inspection certificate	3.1 acc. to EN 10204 with max. deviation	CBA			
<b>Device identification label</b>					
includes lettering	(plain text, max. 16 letters)				
stainless steel	18,5 x 65 mm	MK1			
sticker	41 x 32 mm	MK2			
sticker	11 x 25 mm	MK3			

### 8.2 Order information, accessories 1

	Catalog No.	Code			
<b>Mounting material and cost</b>					
Attachment kit for linear actuators (lateral attachment to DIN/IEC 534 / NAMUR)	stroke 10 ... 35 mm stroke 20 ... 100 mm	7959125 7959126			
Attachment kit for rotary actuators (mounting to VDI/VDE 3845) consisting of:					
a) Adapter (shaft coupler)		7959110			
b) Mounting bracket	dimension A/B = 80/20 mm	319603			
	dimension A/B = 80/30 mm	319604			
	dimension A/B = 130/30 mm	319605			
	dimension A/B = 130/50 mm	319606			
<b>Pressure gauge block</b>					
for single acting TZIDC-110 (1 x for air supply and 1 x for output pressure)	including attachment material with 2 pressure gauges Ø 28 mm				
G 1/4 connections	Supply pressure range 0...10 bar/ 0...140 psi	7959111			
	Output pre 0...4 bar/ 0...60 psi 0...10 bar/ 0...140 psi	7959112			
1/4-18 NPT connections	Supply pressure range 0...10 bar/ 0...140 psi	7959113			
	Output pre 0...4 bar/ 0...60 psi 0...10 bar/ 0...140 psi	7959114			
for double acting TZIDC-110 (1 x for air supply and 2 x for output pressure)	with 3 pressure gauges Ø 28 mm				
G 1/4 connections	Supply pressure range 0...10 bar/ 0...140 psi	7959115			
	Output pre 0...4 bar/ 0...60 psi 0...10 bar/ 0...140 psi	7959116			
1/4-18 NPT connections	Supply pressure range 0...10 bar/ 0...140 psi	7959117			
	Output pre 0...4 bar/ 0...60 psi 0...10 bar/ 0...140 psi	7959118			
(Pressure gauge blocks are delivered as separate units for mounting by the customer)					
<b>Filter regulator, brass</b>					
connections	incl. material for mounting to pressure gauge block thread G 1/4 thread 1/4-18 NPT	7959119 7959120			
(Filter regulators are delivered as separate units for mounting by the customer)					
<b>Operating program for digital communication</b>					
DSV401 (SMART VISION)	on CD-ROM	see Data Sheet 10/63-1.20 EN
